

Meet the Kaspar IT Team

Where every tech mystery meets its match.

With **KBS** at our core and **Lean** methodologies in our toolkit, we're not just solving IT challenges—we're redefining solutions to ensure tech excels for YOU.

Roman: Rooted in OKC, Houston and Dayton, Roman's distinguished career spans several decades and continents. He has provided unparalleled customer service and spearheaded technology initiatives within the military and public sectors. Roman's extensive experience forms a broad skill set, uniquely positioning him to tackle Kaspar's complex IT challenges. As Kaspar IT's most senior technician, his wealth of experience and strategic insights are pivotal in navigating the intricacies of enterprise IT, emphasizing his integral role in our team's success.

Krushan: Originating from India and equipped with IT training from the University of Houston Victoria, Krushan brings a wealth of knowledge and experience to the Kaspar IT team. His tenure at Circle Y's IT department was a period of significant growth, where he sharpened his technical prowess across the IT spectrum and delved into custom development. As our lead Custom Solutions Developer, Krushan is at the forefront of driving productivity and efficiency improvements, embodying the core values of our Kaspar IT mission with every innovative solution he crafts.

Bona: Originating from Lagos, Nigeria, Bona's journey through the global telecoms sector has endowed him with a profound expertise in Lean, Agile, and gap analysis. His role as a business analyst honed his skills in identifying areas for improvement and optimizing processes, making him an ideal fit for the Kaspar IT team. At Kaspar IT, Bona applies his extensive background to lead projects focused on process improvement and current state analysis, significantly contributing to our mission of enhancing efficiency and effectiveness in IT operations.

Colby: Hailing from Yoakum, Colby has always embodied Lean principles, evident during his tenure as a delivery driver at Frito-Lay. There, he revolutionized delivery routes and processes, cutting times by up to 35%, a testament to his relentless pursuit of efficiency. This drive for improvement, while unsettling for fellow drivers due to raised expectations, underscores Colby's commitment to excellence. Transitioning to Kaspar IT, where enhancing efficiency is at the core of our mission, Colby's knack for innovation has flourished. "

Travis: Travis's tech odyssey began in Houston at age of nine with a monochrome Radio Shack computer connected by dial-up to a role-playing game (long before the internet), igniting a lifelong passion for technology that led him from basic programming, to computer audio recording, to 2D/3D design, and finally to IT solutions development and management. At Kaspar IT, he thrives among problem solvers who match their technical prowess with genuine camaraderie, contributing his diverse skill set to our mission-driven projects with enthusiasm.

Memorable lines from **CSI-Shiner** (short lived CSI-Miami spin-off):

(Caruso puts on sunglasses as he steps out of the Shiner police station) "In Texas, we ride horses. But at Kaspar IT, they're riding the digital frontier, herding data like it's cattle. That's cyber justice, Texas style."

(Caruso kneels by a server rack, then stands up slowly) "They say everything's bigger in Texas. That includes the problems. But for Kaspar IT? No code too complex, no data breach too deep. They're the sheriffs in this digital town."

(Caruso turns to face the team as the sun sets over Shiner) "In the wild west of tech, it's easy to get lost in the dust. But Kaspar IT? They're the beacon in a sandstorm, guiding us to safety with grit and grace."

Fun Facts:

Colby once ranked in the 99.998th percentile in the online card game Hearthstone (out of 100 million users). Such a feat requires exceptional problem-solving, decision-making, resource management, pattern recognition, continuous learning skills — and grit.
